Subject Food Web Modeling Tech Memo

Duwamish Reviewers:

Attached is the first of three technical memoranda describing the food web modeling (FWM) effort at the Lower Duwamish Waterway Superfund site. I have also noted below the overall schedule for the three FWM deliverables below. **Comments on this first tech memo are due to EPA on Sept 30. We will also have a meeting October 24, 12:30 - 2:30 pm at EPA to discuss the tech memo and your comments.**

A few additional notes:

- EPA, Ecology, and LDWG have agreed that these FWM interim tech memos will not be very long or detailed - and that a lot of the information would be imparted and discussed in meetings, rather than having LDWG spend a lot of time writing long documents. They will provide full documentation of the FWM effort when they present it in the Phase 2 RI report.

- I'm not planning to mail out hard copies of this short memo - please let me know if this is a problem.

Schedule for future FWM deliverables is:

- Tech memo 2 - modeling approach - October 27, 2005

- Tech memo 3 - results of preliminary model runs - March 10, 2006

Meeting dates for these deliverables TBD

- As a reminder, the FWM meeting that was originally scheduled for today has been cancelled.

Feel free to give me a call if you have any questions.
